### Instructions for assembling the Christiania Bikes three-wheeler.

1. Assemble the rear frame:
  - a. the mudguard
  - b. the rear-wheel
  - c. the chain
  - d. the pedals - NB, **the left pedal has links tread**
  - e. the saddle
  - f. the steering damper  
(and if needed the dynamo holder.)
2. Place the front box on its front and fit the handlebar to the box using the 4 bolts.
3. Fit the bell and the brake lever on the left side of the handlebar; the brake cable follows down along the right side of the handlebar.
4. Fit the front wheels with the brakes; observe that the brake bearing plates are held by a bolt M6 thread. (photo 4.b).
5. Connect the rear frame to the front by means of the 4 bolts under the box.
6. Adjust the safety device for the steering gear: draw down the safety shores into a triangle, push the tube into the head steam and fasten it to the shores using the bolt (photo 6.c).
7. Fasten the gear cable to the head tube and to the chain stay. Adjust the gears according to the enclosed manual.
8. Adjust the front brakes in the left and right sides using the adjust screws. (photo 8)

**Have a good time!**

**And a nice riding time.**

**With the best regards from the Christiania Bikes team.**
