

COMFORT RACK FOR UPRIGHT FREEZERS

The Comfort rack for upright freezers is an exclusive racking system. These racks insure a more ergonomical operating process when working with your samples. In the Comfort rack the cryoboxes are placed in drawers. This increases the flexibility and reduces the operating weight compared to the rack types.

Select from 3 different box heights and measure the inside height and depth of your freezer when choosing the right racks. Our racks can be used with all freezer models. The racks are made of stainless steel.

The racks below are sold without cryoboxes. They are also offered including standard white cardboard boxes with 9x9 cell dividers.

- Below No. of boxes is expressed by Height x Dept = No. of boxes

Article no.	Box height	HxDxW mm	No. of boxes
TE24232	50 mm	223x562x140	4x4 = 16
TE24274	75 mm	239x562x140	3x4 = 12
TE24302	100 mm	210x562x140	2x4 = 8
