

Our second goal is to *improve our current products*.

While we are waiting for the charging limit increase, we have decided to extend our GREEN line.

This means that our models ALASKA VBN and CLIPPER VBN will be available also with the lengths of 150 - 180 - 240 (only ALASKA VBN). The cabinets with a > 120 length will have two refrigeration circuits.

R290

New ticket strip

We have decided to improve our ticket strips system. Starting from May 2019 a new PVC ticket strip will be fitted on our cabinets. It will be available in transparent and black version.

ON/OFF switch

We have also decided to equip our cabinets with an ON/OFF switch as we noticed that many cabinets are switched off in the evening hours. Up to now this option was available only on demand. It will now be offered as a standard part of our cabinets starting from May 2019.

Product improvements

Starting from May 2019

Our third goal is to *develop new products*. We have recently made a market research and found out that in the main European countries there is a big increase of convenience stores, petrol stations and food-to-go shops. Our Sales, R&D and technical depts. focused on finding a *cool idea to keep it fresh* in a *GREEN* way.

The result is *MERCURY!*

MERCURY is a versatile cabinet *charged with R290* in plug-in version. It will be available in 4 lengths and 1 depth (622 mm):

71

100

135 (2 ref. circuits)

180 (2 ref. circuits)

On the remote version all expansion valves will be available on demand.

The following options will be available:

nightblind, manual shutter in 3 colors, illuminated top front, shelf illumination, tray holder, full ends, panoramic ends, internal mirrored ends, castors, product stoppers, hooksbar for interior back, can holder, active oxygen device

MERCURY

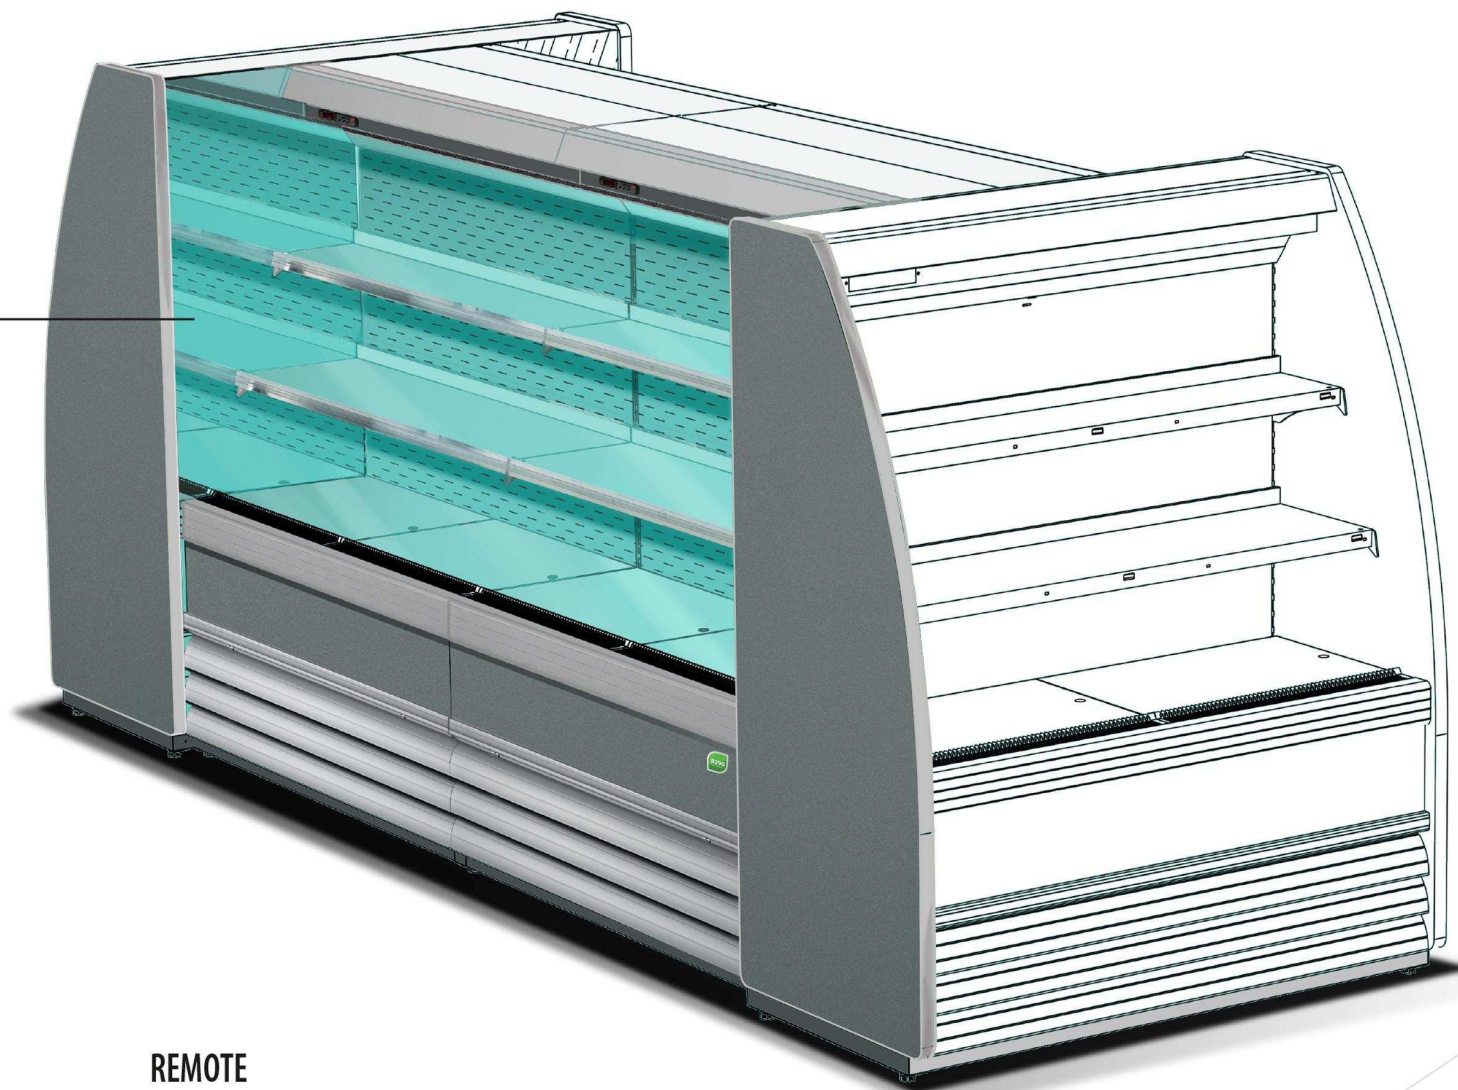

Walk around and shop

Mercury will give you the possibility to create islands for a *360° shop experience.*

It will be fully multiplexible and you will be able to order it without ends to create your personal composition.
