- 8 Rimuovere i cavi dal blocchetto (D).
Remove terminals from the connector (D).

- 9 Rimuovere dalla vasca il materiale isolante e sfilare i due cavi nero della motoventola.
Remove the insulating material and extract the motor fan black cables.

AB 700 P

AB 700 N

- ⑩ Prendere il cavo bianco motoventola (E).

Take the motor fan power supply cable (E).

- ⑪ Collegare il cavo (E) alla nuova motoventola (F).

Connect the power supply cable (E) to the new motor fan (F).

- ⑫ Collegare il cavo terra della motoventola (F) (vedi come immagine).
Connect the ground wire of motor fan (F) (see as picture).

AB 700 P

AB 700 N

- 13** Avvitare la motoventola (**F**) al nuovo supporto motoventola e alla griglia.
Screw the motor fan (**F**) to the new motor fan support and grid.

ATTREZZI NECESSARI: Cacciavite
TOOL TO BE USED: Screwdriver

AB 700 P

AB 700 N

- 14** Inserire il cavo alimentazione motoventola (**E**) nel foro interno vasca, come da immagine.
Insert the motor fan power supply cable (**E**) into the hole, see as picture.

Insert the motor fan power supply cable (**E**) into the hole, see as picture.

AB 700 P

AB 700 N

- ①⑤ Collegare il cavo alimentazione
motoventola (E) al blocchetto (D).
Connect the motor fan power supply
cable (E) to the connector (D).

- ①⑥ Collegare il blocchetto (D) come da
figura.
Connect the connector (D) (shown in
picture).

- ①⑦ Isolare il foro.
Insulate the hole.

- ①⑧ Fissare i cavi con le fascette come da
figura.
Fix the cables with fasteners as
picture.

- 19** Avvitare il supporto motoventola copertura.
Screw the motor fan support and the cover.

ATTREZZI NECESSARI: **Cacciavite**
TOOL TO BE USED: **Screwdriver**

AB 700 P

AB 700 N

- 20** Avvitare la griglia posteriore.
Screw and remove rear grid.

ATTREZZI NECESSARI: **Cacciavite**
TOOL TO BE USED: **Screwdriver**

- 21** Inserire la griglia anteriore.
Insert front grid.
